

THE ENVIRONMENT IS ON EVERYONE'S AGENDA.

Mandatory carbon reporting. Financial imperatives. Good corporate citizenship. These are issues that every company is grappling with.

IT'S BEEN ON OUR RADAR FOR YEARS.

In recent times we've introduced forestry certification, recycling, renewable energy programs and the ISO 14001 environmental standard. We are committed to reducing our environmental footprint in measurable ways going beyond just compliance to positive initiatives. As part of this ongoing process we produce a range of products that meet the needs of our customers and which help them build their own environmental credentials.
