

When I grow up, my mind and body will slowly deteriorate until I choke to death trying to swallow.

Every child born to a parent with Huntington disease has a 50% chance of sharing the same fate.

It's passed from parent to child, a debilitating brain disorder that's inevitably fatal and completely incurable – until now. Last year, for the first time in 135 years of study, Huntington's was successfully cured in a mouse. We've never been closer to eliminating this disease. All we need is your support to take the final steps. **Please give generously.**
